MECX provides environmental and civil engineering; soil and groundwater remediation; chemistry data validation; due diligence; indoor air quality; compliance auditing and permitting; environmental and specialty construction management, litigation support; assessment, treatment design, monitoring and chemicals for process water and wastewater treatment.

PIKA

INTERNATIONAL, INC.

A small disadvantaged business with over 100 professional staff members. Our main purpose is to satisfy and resolve our clients' challenges through experience and innovation in the areas of UXO/MMRP, HTRW, and Radiological Services. For more than thirteen years, PIKA has researched, developed, tested, and implemented a variety of innovative technologies resulting in safety improvements and resolution to complex issues. PIKA executes for AEC, Baltimore District, Omaha District, USAESCH, AETC (AFCEC), and National Guard. PIKA provides services CONUS and OCONUS. PIKA utilizes its strengths and best practices to exceed client expectations with safety and quality as lead objectives.

Pond is an Atlanta headquartered engineering, architecture, planning and construction firm. With 20 offices across the nation and around the world, Pond provides services to federal government, private, and public clients in industries that protect our country, provide for the transportation of goods and services, and facilitate the transfer of energy throughout the nation.

Pond's professionals serve clientele in various disciplines including aviation Pond's, civil engineering, transportation engineering, architecture, landscape architecture, oil & gas engineering, military planning, building systems engineering, and construction services. These experienced professionals work in unison, delivering exceptional results for clients, emphasizing personal commitment, innovation and integrity.

PRIME AE Group, Inc. (PRIME) is a multi-disciplinary architecture, engineering, and construction management firm, serving public and private clients since 2007. Headquartered in Baltimore, Maryland, PRIME has grown to more than 370 professionals in 13 offices, focusing on the needs of government, higher education, institutional, and private clients. As a testament to our rapid growth, PRIME has graduated our small business status and is now ranked 329th on the Top 500 A/E Design Services Firms by *Engineering-News Record* (based on annual revenues). PRIME combines a wealth of experience and diverse capabilities to complete projects to the satisfaction of its clients.

For 75 years, RS&H has provided services to the DoD. Through offices nationwide, RS&H provides solutions to the defense, aerospace, aviation, education, corporate, medical, science, and transportation markets. RS&H has a multidiscipline team of architects, engineers, planners, and technical support personnel, as well as energy engineers, commissioning agents, environmental scientists and indoor air quality specialists.

RS&H is proud to have been named the SAME Seymour Greenfield Sustaining Member Firm for the past two years. Additionally, RS&H is ranked #70 of the Top Design Firms in *ENR*, and #5 of Top Military Architecture and #26 of Top A/E Firms by *Building Design + Construction*.
