SIEMENS

Siemens is a recognized leader for safe, reliable, and energy-efficient buildings and infrastructures. Our portfolio allows us to manage building automation, fire safety & security, power distribution & management, and energy efficiency & sustainability. We deliver solutions and services to the Federal Government across the Country, and around the World. Our experience spans all types of facilities from DOD, VA, and GSA to Prime Contractor facilities and other critical infrastructure such as airports. We offer multiple contract vehicles and a commitment to partner with small businesses. For more information, please contact Terri Marroquin or Raymond Patterson at [972-550-8488](tel:972-550-8488) / www.usa.siemens.com/usfederal.

SAME Fort Worth Featured Sustaining Member Firms – October 2016

SpecPro Environmental Services LLC (SES) is a wholly owned subsidiary of Bristol Bay Native Corporation, an Alaska Native Corporation comprised of approximately 8,500 Eskimo, Indian and Aleut shareholders.

SES is a small company with a big reputation for providing quality construction and environmental services to government clients. Selecting a superior contractor for the job is crucial to getting things done right the first time. At SES, we understand that every client wants a successful outcome, whether it is a renovated building, a site remediation project or an erosion control solution. To ensure that we consistently meet and exceed customers' expectations, SES provides experienced project managers who are totally committed to the goal of delivering professional services in an efficient and timely manner. We are proud of our successful history of repeat business from our loyal customers. Moreover, we understand regulatory requirements and we have a nationwide system in place to ensure that resources are available to get the job done wherever it may be.

Founded in 1890, Sundt Construction, Inc. is one of the country's most innovative and respected general contractors, performing work in the Transportation, Industrial and Building markets. The 100 percent employee-owned company is consistently ranked among the 100 largest general contractors in the United States and was named the nation's safest construction company by the Associated General Contractors of America in 2006 and 2015. With offices throughout the Greater Southwest, the company's 1500 employee-owners are united around a single purpose: To build environments where our clients, employee-owners and communities prosper.

Stanley Consultants INC.

For 103 years, Stanley Consultants has delivered engineering excellence to federal, military, commercial, industrial, and institutional clients. With 1,100 member/owners and offices in 24 stateside and 12 overseas locations, we provide innovative solutions to our customers' most pressing challenges. Stanley Consultants specializes in military master planning, sustainment management, design & construction, energy conservation, security, and infrastructure engineering. Additionally, our extensive civil works portfolio includes inland navigation, flood control, and hydroelectric power. Stanley Consultants has completed over 25,000 projects in all 50 states and 105 countries, and is ranked 73rd in Engineering News Record's 2016 list of "Top 500 Design Firms".

Founded in 1994, SAM is a leader in providing complete geospatial solutions.

SAM's complete geospatial approach gives us the tools and skills to develop efficient and customized solutions for projects of any scale. This gives our clients the benefit of a single point of contact for a comprehensive set of surveying and mapping products. The size of our available workforce means we are able to use these tools effectively to accomplish even large-scale projects on accelerated schedules. From rail to roadway, oil and gas to electric, civic to federal, the impressive SAM project portfolio demonstrates our proven track record of surveying, geospatial, SUE, utility coordination, and construction phase services for a wide variety of clients. Additionally, we offer a range of construction services through our wholly owned subsidiary [SAM-CS®](#)

Above all, client satisfaction is our priority—we only consider a job complete when our client is successfully using the product. To us, there is no measure that matters as much as yours.

Terracon is a 100 percent employee-owned consulting engineering firm providing quality services to clients. Since 1965, Terracon has evolved into a successful multi-discipline firm specializing in:

[Environmental](#)

[Facilities](#)

[Geotechnical](#)

[Materials](#)

Over its history, Terracon has achieved significant expansion through both internal growth and acquisitions. Terracon currently has more than 3,500 employees in 130 offices, serving all 50 states nationwide. Additionally, we partner with our U.S. clients to serve their international needs. The firm's success is further evidenced by a current ranking of 32 in Engineering News-Record's 2016 list of the Top 500 Design Firms, as compared to a ranking of 58 a decade ago. Terracon's growth is due to dedicated employees who are responsive to clients, provide quality services, and take advantage of opportunities in the marketplace.

As a passionate steward of the environment, TerranearPMC (TPMC) is dedicated to improving and sustaining our environment and infrastructure through delivery of innovative, high-value project services that meet or exceed our clients' needs and expectation. Our strategic solutions are designed to reduce risk and cost with a flexible approach designed to manage continually changing conditions. Our technical excellence and personal attention foster effective communication and develops mutually beneficial, long-term relationships.

TETRA TECH

With more than 350 full-service offices worldwide, including Fort Worth, Austin, San Antonio and Houston, Tetra Tech is a leading provider of consulting, engineering, program management, construction management, and technical services. Founded in 1966, nearly one half of the company's annual revenue comes from projects completed for the federal government and over one third specifically from Department of Defense projects. Tetra Tech consistently ranks at or near the top in numerous categories according to Engineering-News Record (ENR), including in the top ten of the Top 500 Design Firms for the last decade. Tetra Tech is currently a subcontractor to Blair-Remy Architects on several Ft Worth District contract vehicles.

THE RIOS GROUP

SUBSURFACE UTILITY ENGINEERING | UTILITY COORDINATION

Established in 2012, The Rios Group, Inc. (TRG) is a Texas Corporation providing professional Subsurface Utility Engineering (SUE), and Utility Coordination (UC) services. The firm has provided these services for 13 years, including the 8 years they were known as the Utilities Division of Gorrondona & Associates. Headquartered in Fort Worth, Texas, TRG maintains a staff of more than 30 people, with additional locations in Dallas, Houston (The Woodlands), Austin (Round Rock) and San Antonio. Because TRG owns all its equipment consisting of 14 vehicles, and 7 Vacuum Excavation Units, as well as core drills, traffic control equipment, and other necessary ancillary supplies, we can offer an exceptional response time. The firm is certified by the State of Texas as a Historically Underutilized Business (HUB), and by the NCTRCA as a Disadvantaged Business Enterprise (DBE), a Minority Business Enterprise (MBE), and a Small Business Enterprise (SBE).

ROSS GROUP

The Ross Group Construction Corporation, a contracting company, provides facility and infrastructure solutions. It offers preconstruction services, including bid packaging, budget development/cost-modeling, design engineering, estimating, lifecycle cost analysis, programming, project feasibility studies, scheduling, subcontractor pre-qualification, M/WBE planning, and engineering services. The company also provides construction services, such as cost control, equipment and material procurement, project management, quality control, scheduling, safety and subcontractor management, and total
