SAME Fort Worth Featured Sustaining Member Firms – November 2017

Etegra, Inc. is a full service, 30+ person 8(a) DBE/MBE A-E firm. Our primary services are architecture, engineering, and construction management for the DoD and numerous Federal Agencies. Etegra also provides civil, mechanical, electrical, plumbing and fire protection engineering to our public and private clients. As the prime, Etegra currently holds more than \$75 Million in A-E IDIQ value with various agencies to include: USACE Ft. Worth, USAF, GSA, USDA, Bureau of Engraving and Printing and National Geospatial Intelligence Agency. We also are subcontractors on contracts for USACE Kansas City, USACE Tulsa, USACE Louisville, USACE Huntsville, USACE Mobile, and AFCEC.

Challenges Accepted — a phrase that defines our people, our company, and — most importantly — our approach to development, engineering, and construction. Since 1979, Ross Group has worked hand-in-hand with USACE, NAVFAC, GSA, and many other state and federal clients, providing industry-leading solutions on projects across the country. Ranging from \$1M to \$80M, these include barrack and dorms; operations, administration, and training facilities; training ranges; hangars; and fire stations. By offering an integrated suite of services to fit any need in any market, we commit to making sure each project ends just as our clients envisioned it.

The Rios Group, Inc. (TRG) was founded in 2012 but our talented team of Subsurface Utility Engineering and Utility Coordination experts have been together since 2004 in a firm that was eventually acquired by TRG. Headquartered in Fort Worth, TRG maintains a staff of more than 35 people, with additional locations in Austin, Houston, San Antonio and Dallas. The firm is certified by the State of Texas as a Historically Underutilized Business, by the NCTRCA as a Disadvantaged Business Enterprise, and by the NCTRCA and SCTRCA as a Minority Business Enterprise, Woman Owned Business Enterprise and a Small Business Enterprise.
