# AN OVERVIEW OF ASSET MANAGEMENT @ FORT WORTH

ELIZABETH YOUNG, GISP

# AGENDA

- What is Asset Management
- Asset Management @ City of Fort Worth
- Streets & Traffic Management Initiative

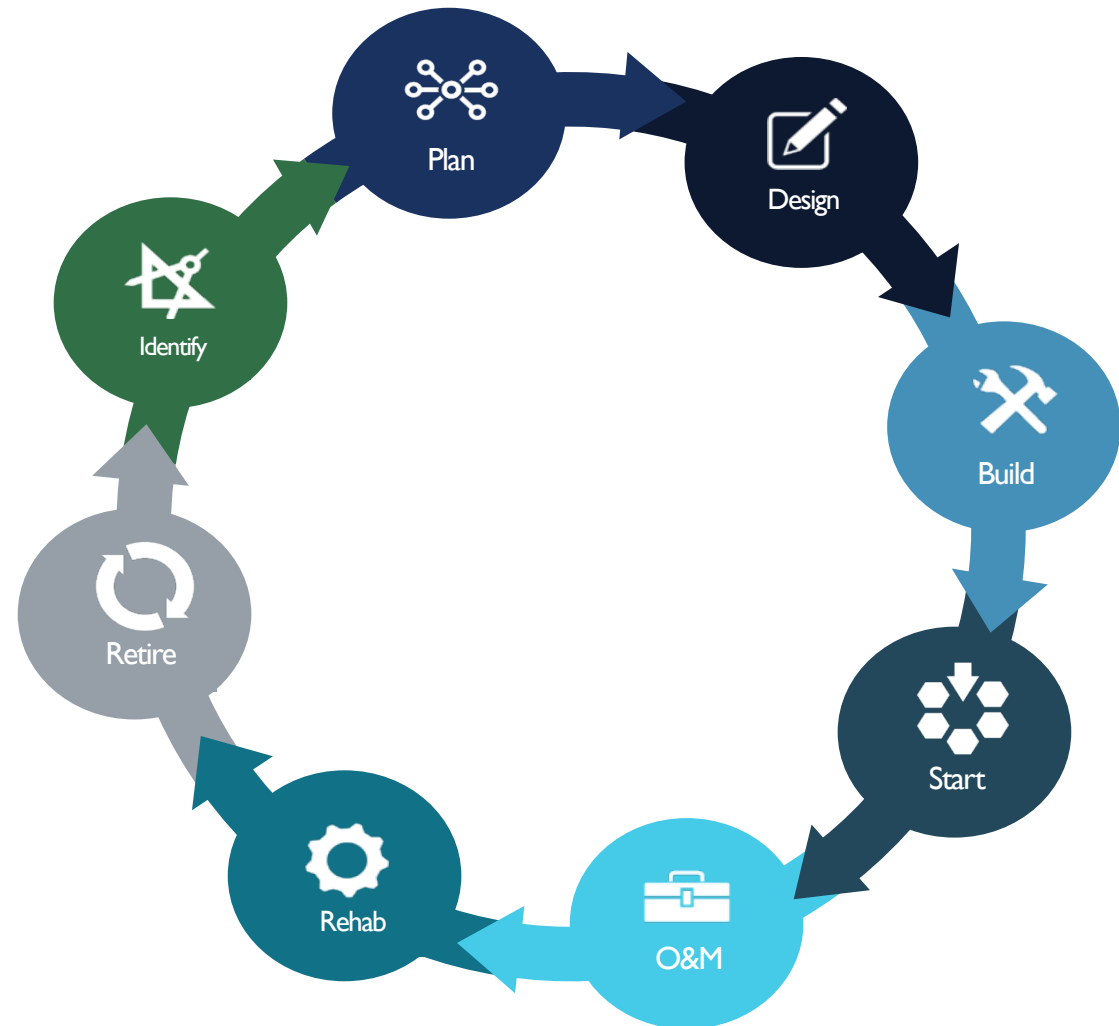

## WHAT IS ASSET MANAGEMENT

# DEFINING ASSET MANAGEMENT

Asset management is a process for providing the public with a cost-effective level of service by making the right decisions on the acquisition, maintenance, operation, rehabilitation and disposal of assets.

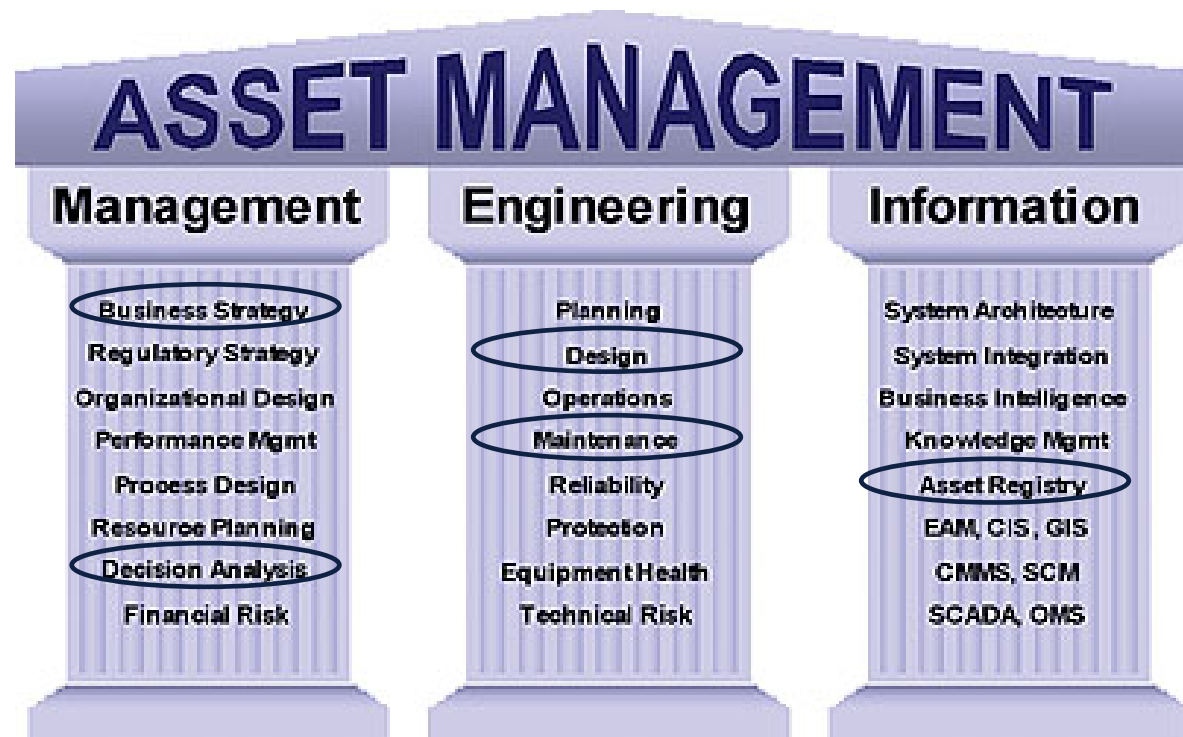

“A process for maintaining a desired level of customer service at the best appropriate cost.”

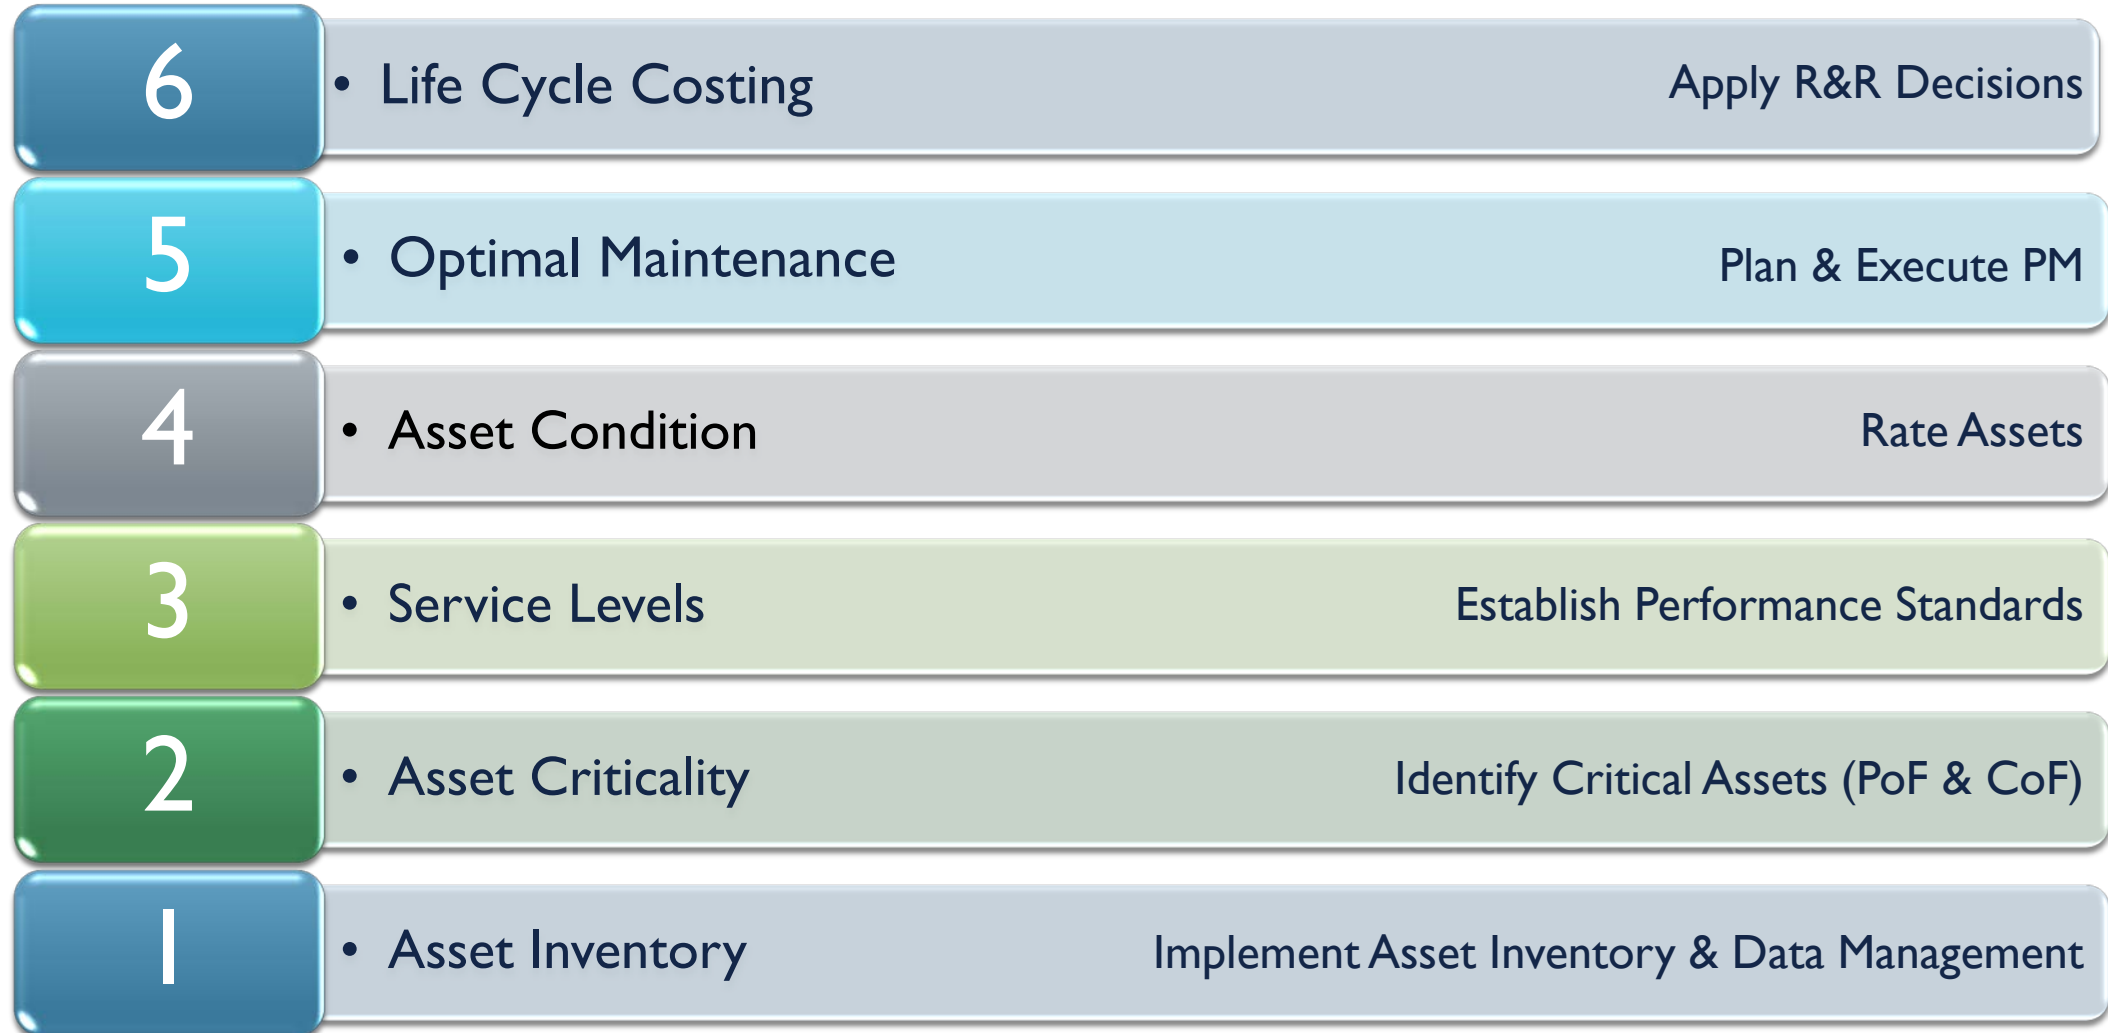

## DEFINING ASSET MANAGEMENT

- The **Strategy** considers the linkage between condition, service levels, useful life, and repair costs relative to service delivery costs and revenue
- The **System** provides information needed to make decisions on the acquisition, maintenance, operation, rehabilitation, and disposal of assets

# A COMPLETE ASSET MANAGEMENT STRATEGY/PROGRAM

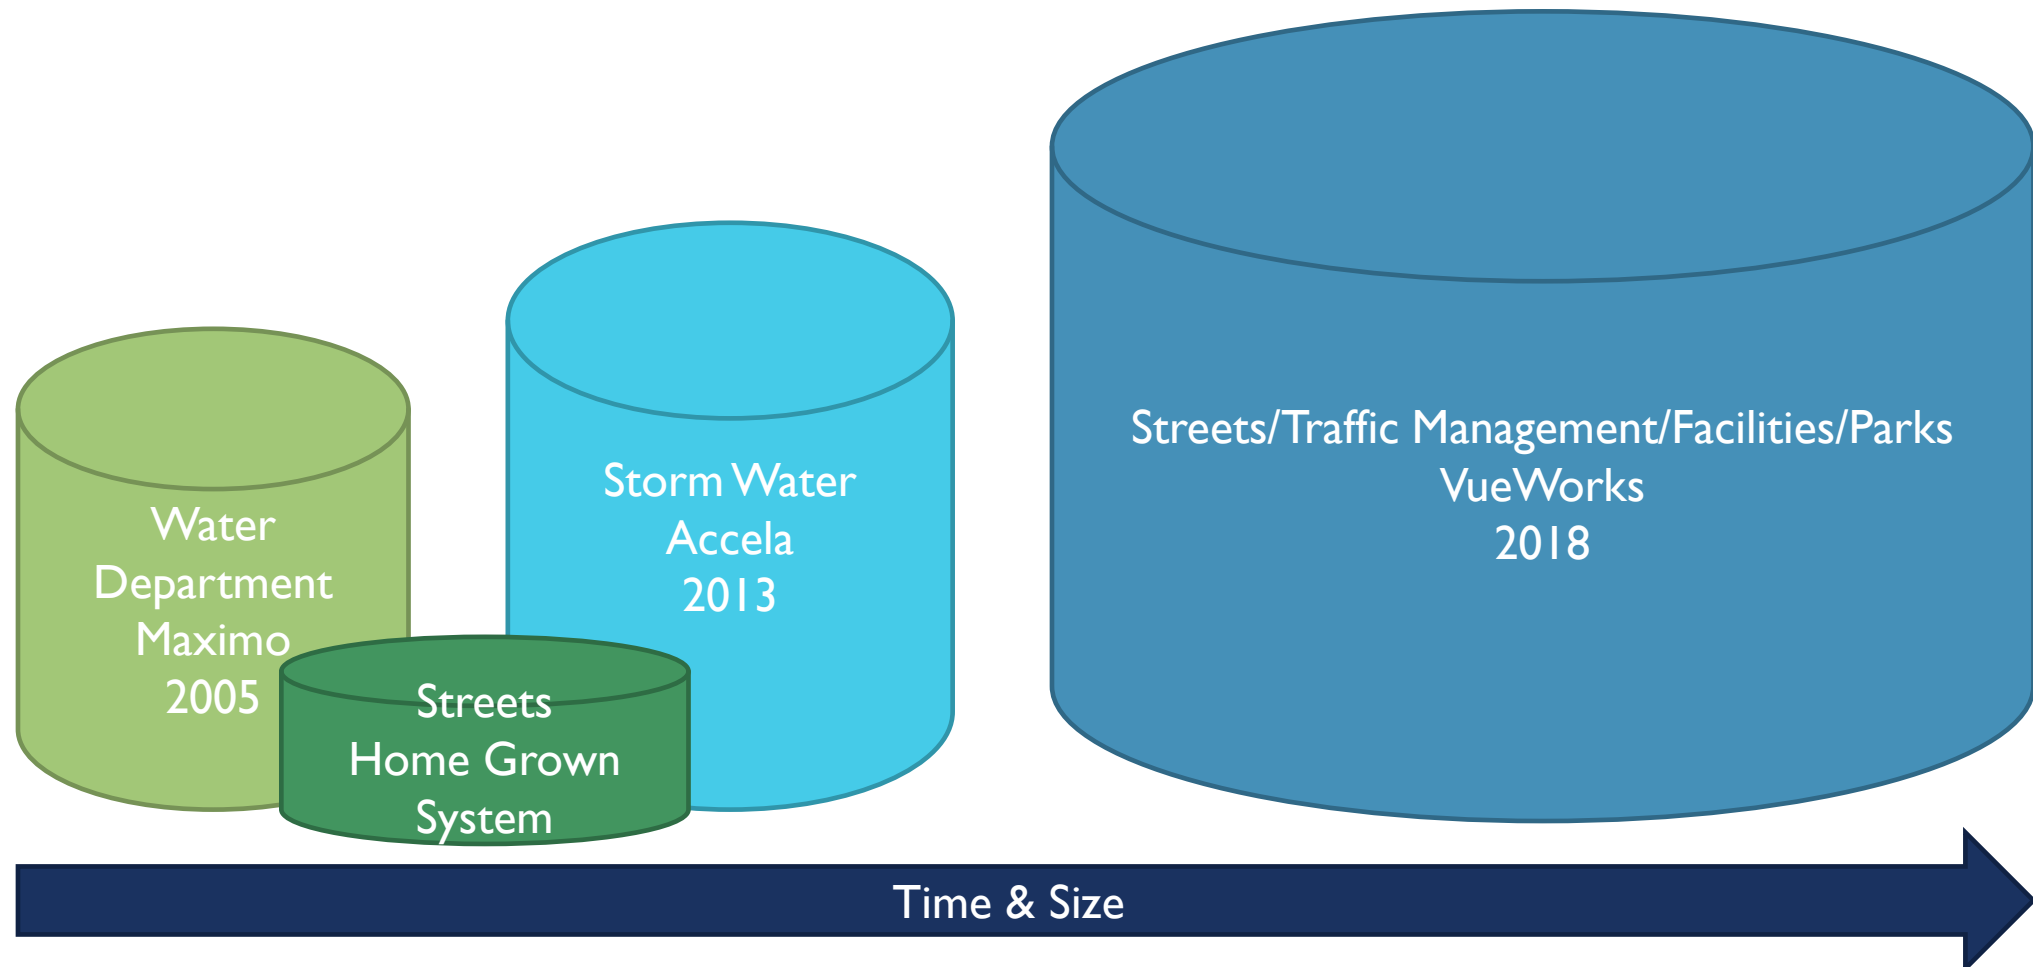

# OVERVIEW OF THE ASSET MANAGEMENT ELEMENTS

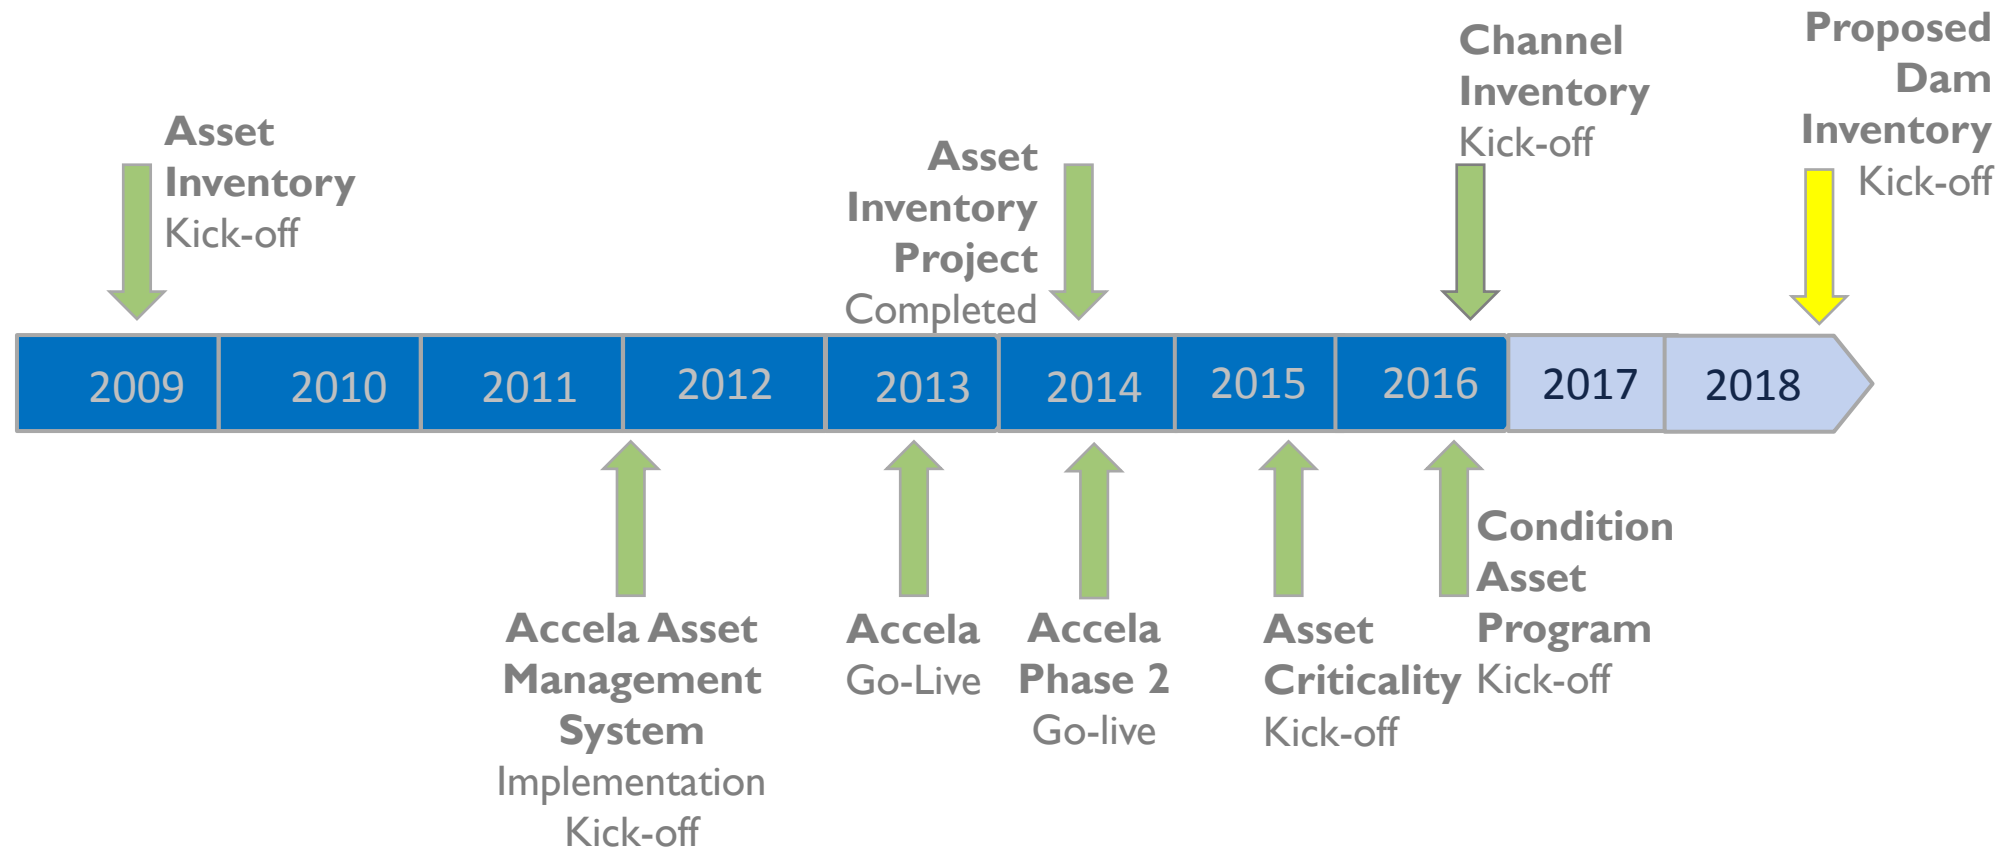

## ASSET MANAGEMENT @ THE CITY OF FORT WORTH

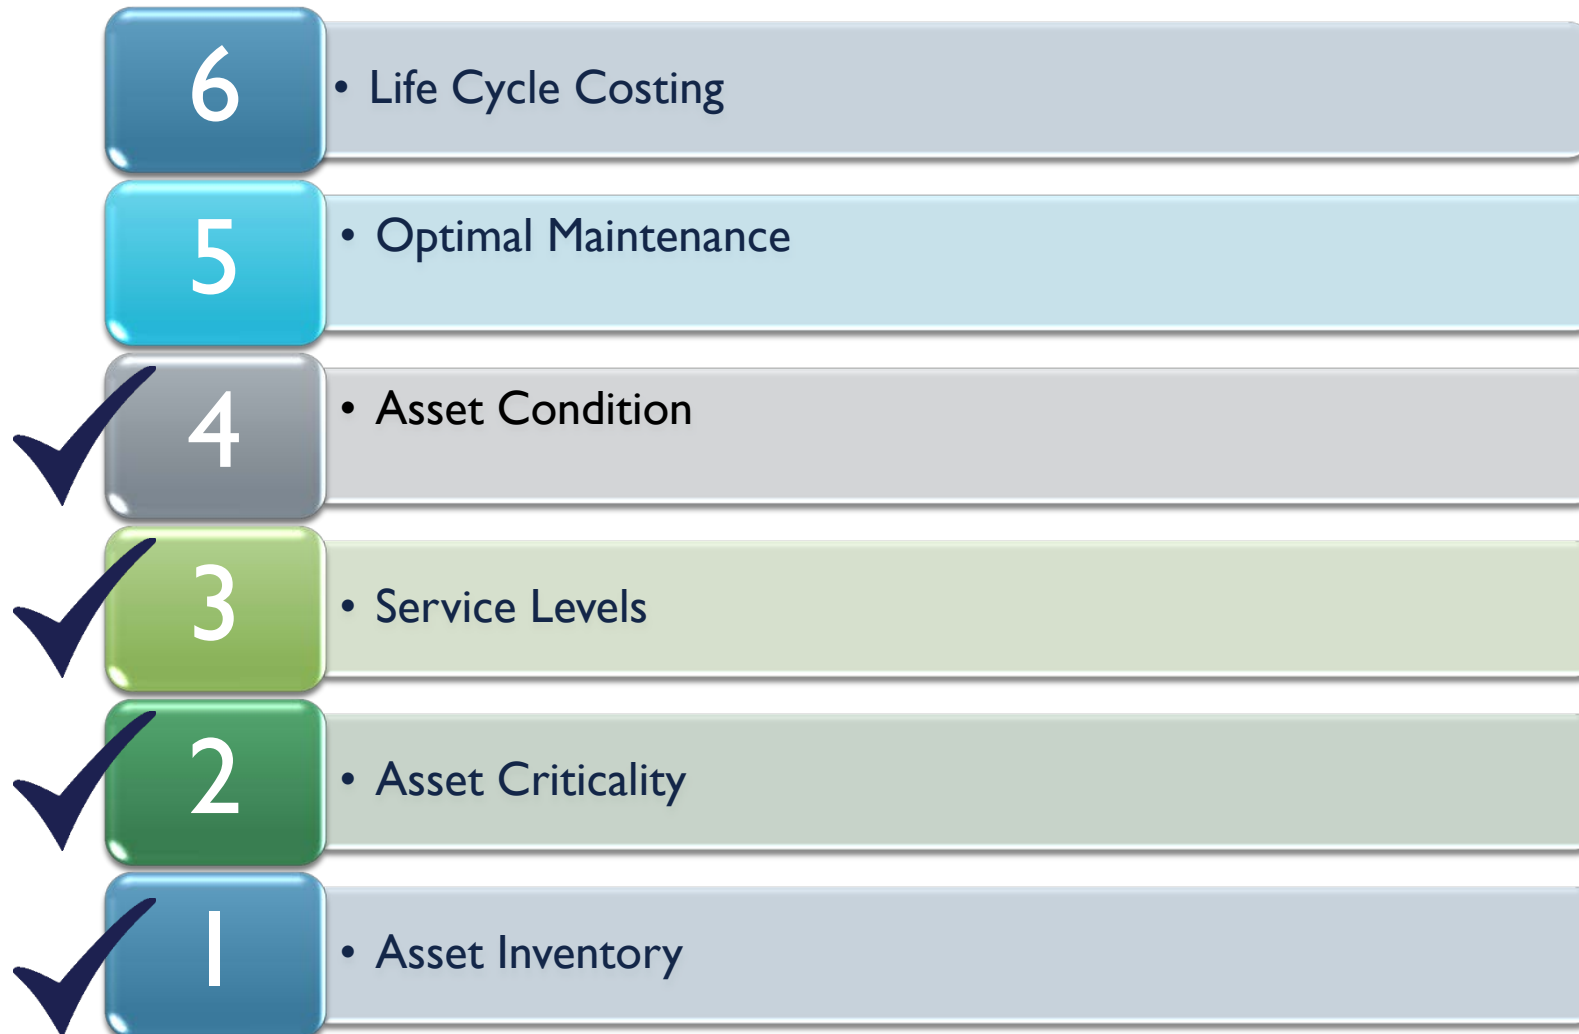

# SOFTWARE AND DATA EVOLUTION

# STORMWATER MILESTONES

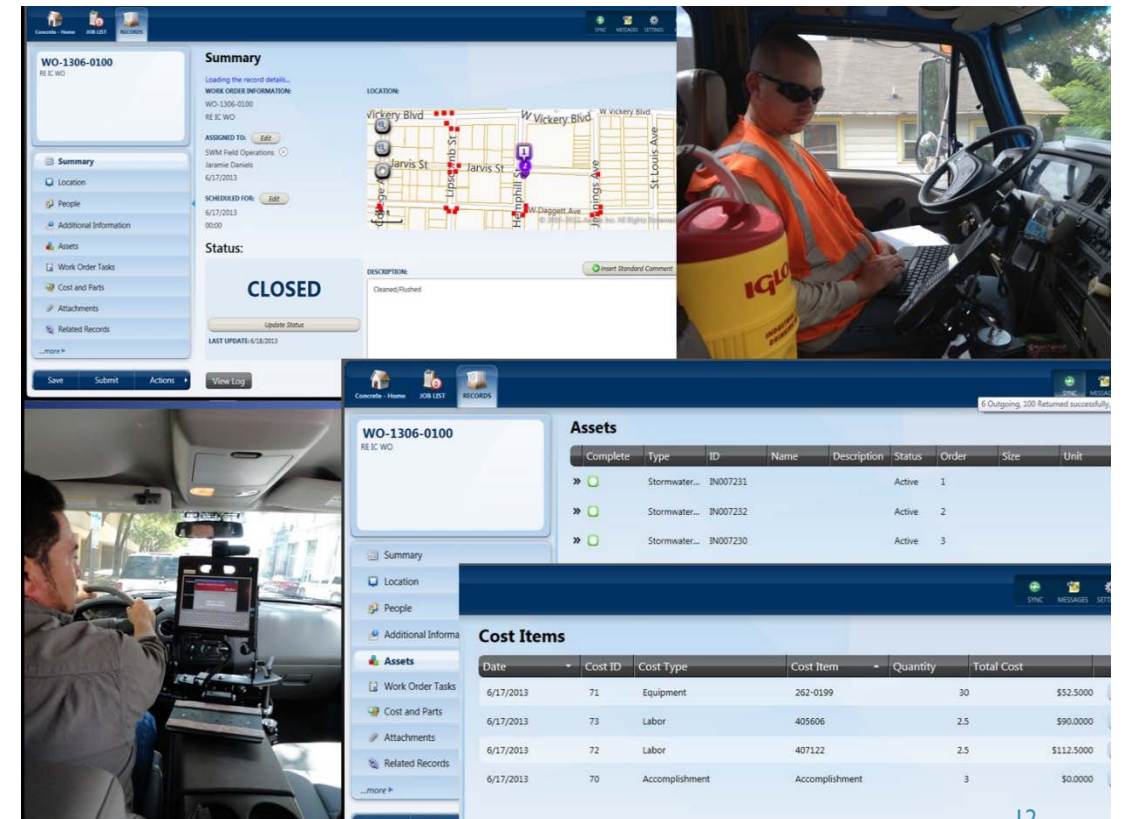

# STORMWATER ASSET MANAGEMENT PROGRESS

# STORMWATER SUCCESS

## SHORT TERM BENIFITS

- Better Data Accuracy
- Reporting Needs Met
- Data collected on SWM Assets vs Addresses
- Work Orders, GIS, and attached documents and images available to staff from the field
- Mobile Devices allow crews to do data entry

The collage illustrates the integration of mobile technology in stormwater management. It features a mobile application interface with the following components:

- Summary Page:** Displays work order details for WO-1306-0100, including location, assigned staff (Jasmine Daniels), and status (CLOSED).
- Map:** Shows the location of the work order on a street map, with markers for Vickers Blvd, Jarvis St, and other nearby streets.
- Assets Table:** Lists stormwater assets with their status and order details.
- Cost Items Table:** Provides a detailed breakdown of costs for the work order.

Complete	Type	ID	Name	Description	Status	Order	Size	Unit
»	Stormwater...	IN007231			Active	1		
»	Stormwater...	IN007232			Active	2		
»	Stormwater...	IN007230			Active	3		

Date	Cost ID	Cost Type	Cost Item	Quantity	Total Cost
6/17/2013	71	Equipment	262-0199	30	\$52,500.00
6/17/2013	73	Labor	405606	2.5	\$90,000.00
6/17/2013	72	Labor	407122	2.5	\$112,500.00
6/17/2013	70	Accomplishment	Accomplishment	3	\$0.0000

# STORMWATER SUCCESS

## EFFICIENCY BENEFITS

### VEGETATION MAINTENANCE

- Paperwork Reduced by 90% +
- Time Savings of at least 1 hr/Day

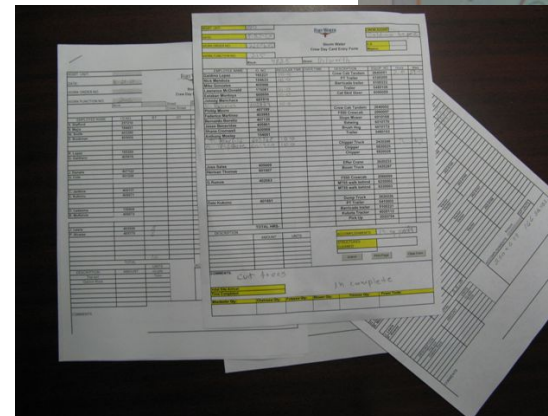

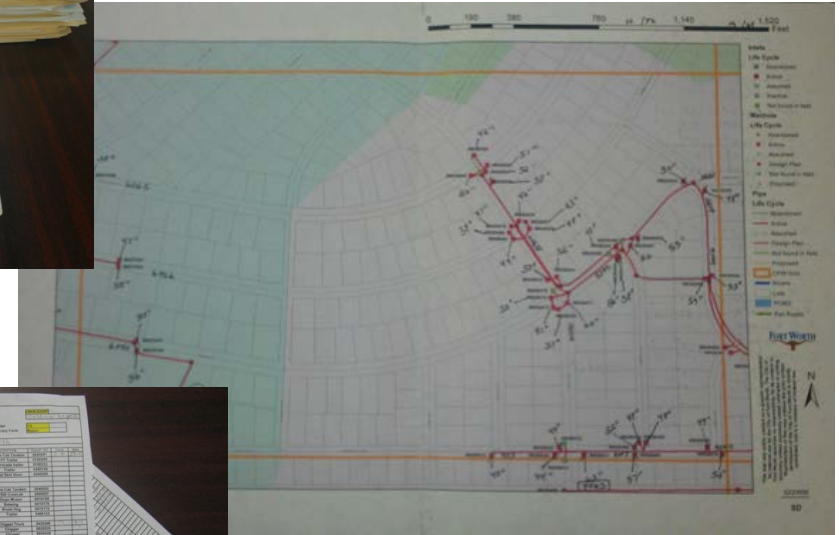

James Lee, Vegetation Maintenance Supervisor said “I like not having a stack of paper to keep up with daily ... to file and store in a folder monthly, yearly, etc ....”

# STORMWATER SUCCESS

## EFFICIENCY BENEFITS INLET CLEANING

- Eliminated:
  - Paper Maps
  - Crew Day Card
  - Data Entry Backlog
  - Temp Employee
- 3 Year Cycle vs. 8 Year Cycle

## STREETS & TRAFFIC MANGEMENT ASSET MANAGEMENT INITIATIVE

# TECHNOLOGY WE HAVE...

What it does:

- Tracks Service Request
- Tracks work including costing
- Allows for dispatching tickets by group or person
- Validate on addresses
- Report on work completed
- ...

The screenshot displays a web application interface for tracking service requests. The top navigation bar includes links for 'New', 'Templates', 'Quick Actions', 'Reports', and email links for 'Vince Elias', 'Allen Hall', 'James Lee', 'Timmie Whitley', and a 'Print Workorder - TPW 2' option. The main content area is titled 'Issue: 15276392 (Active)' and features a 'Mapco' button and a 'Council Information' section with fields for 'District' and 'Member'. Below this is a tabbed interface with 'Details' selected, showing fields for 'Location Information' (Block, Direction, Street, Suffix, Direction, Alternate Phone, Location Notes) and 'Cross Street Information' (Location Street, Cross Street, To Cross Street, Contact Name). The 'Issue Information' section at the bottom includes dropdowns for 'Department' (Trans/Public Works), 'Category' (Storm Water), 'Issue Type' (Other - See Description (SW)), 'Description' (Journal Note Test), 'Resolution' (None), and 'Resolution Details'.

# TECHNOLOGY WE NEED...

- Track work against Assets
- Assess Condition of Assets
- Schedule Preventative Maintenance
- Utilize Condition to prioritize work through decision trees
- Conduct Budget Forecasting
- Mobile
- ....

# SOFTWARE REQUIREMENTS

## 200+ Requirements

- Service Requests/Work Orders
- Asset Inventory and Mapping
- Look and Feel
- Usability
- Pavement Management
- Reporting
- Mobile

34	Provide statistical analysis of asset history and condition data to support predictive maintenance, and generate work orders based on the outcomes of analysis.	High
35	Provide statistical analysis of asset history and condition data to support root cause analysis of failures, and generate work orders based on the outcomes of analysis.	High
36	Provide statistical analysis of asset history and condition data to support asset criticality assessment and tracking.	High
37	Provide statistical analysis of asset history, criticality, and condition data to support asset prioritization.	High
38		
39	<b>Asset Inventory and Mapping</b>	Rank Low, Medium, High
40		
41		
42		
43	Ability to identify and map location of all assets and infrastructure including external infrastructure (e.g. private, City, etc.) through integration with the City's ESRI GIS.	High
44	Support inspections and condition monitoring, and storing results for the life of the asset.	High
45	Provide tools for scheduling routine inspection and conducting routine condition assessments for user defined assets.	High
46	Ability to create and manage equipment and materials inventory. (Total cost)	High
47	Warehousing (see 47). Intergration Point	Medium
48	Ability to track and monitor warranty data on assets, including system, component, and accessory warranties and/or maintenance bonds.	High
49	Track each warranty assigned to an asset by date, usage, time, and other pertinent parameters (e.g. hours) and the Vendor / Contractor responsible for the warranty and/or maintenance bond.	High
50	Ability to track asset maintenance by geographic boundary (ex. Quadrant or Council District)	High

# 4

## ASSET CONDITION

**Pavement Condition Index (PCI)** is a numerical index between 0 and 100, which is used to indicate the condition of a specific section of road pavement.

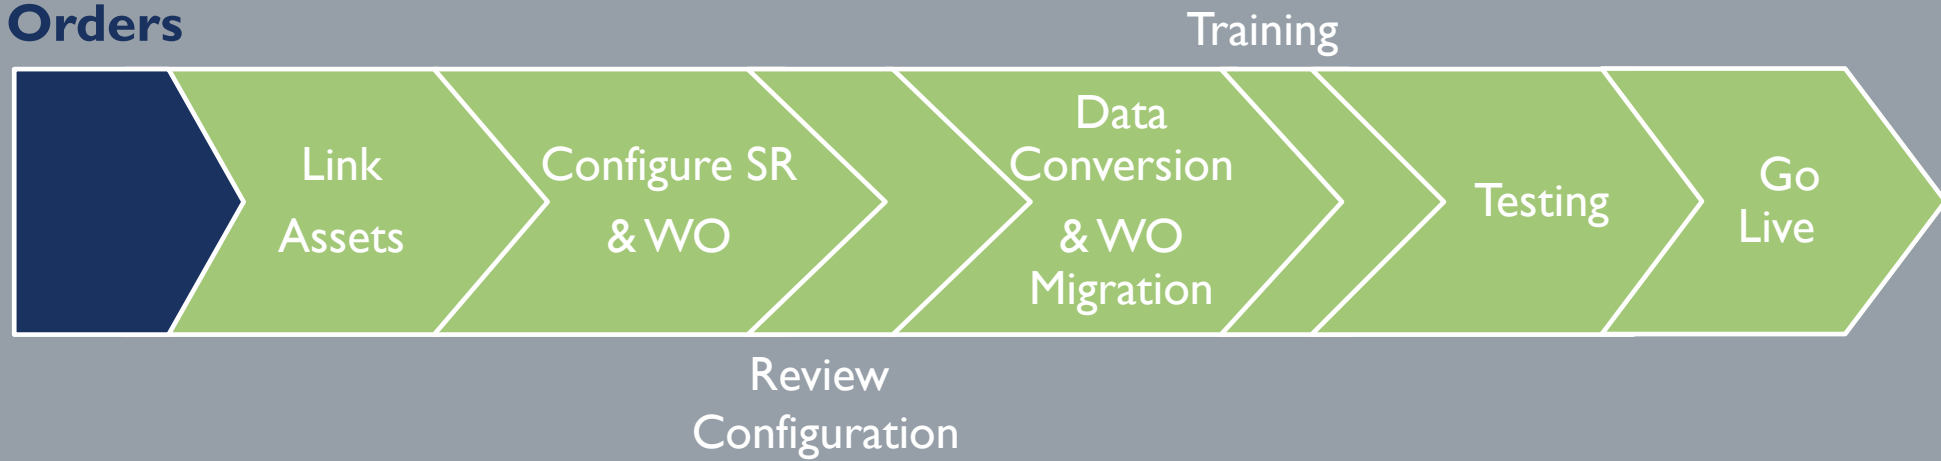

**Overall Condition Index (OCI)** utilizes the PCI but also takes into account other factors such as, curb/gutter condition and missing curb.

**Simple Condition Rating** is being used for all other assets currently using a good, fair and poor index to describe condition with a description defining each of these based on asset type.

# IMPLEMENTATION PROCESS

## Work Orders

## Advanced Asset Management

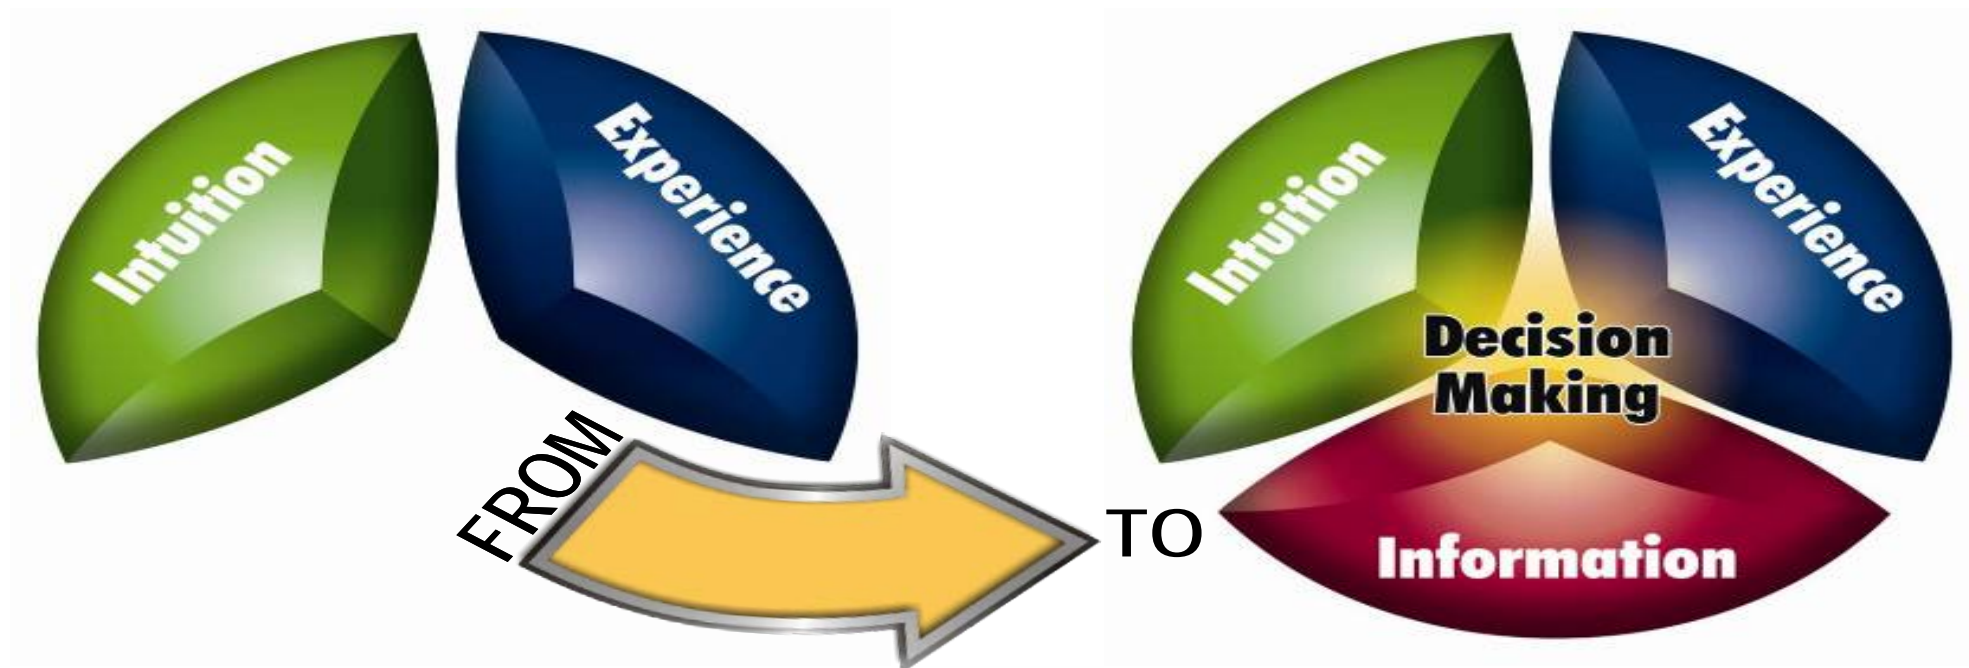

# WHAT DO WE EXPECT TO GET?

## SHORT TERM:

- Better Reporting
- Less Paper
- Better Customer Service
- Understand and Communicate the Condition of our Assets
- Real Time Updates
- Better Plan and Coordinate Preventative Maintenance

# WHAT DO WE EXPECT TO GET?

“It is a capital mistake to theorize before one has data. Insensibly one begins to twist facts to suit theories, instead of theories to suit facts.”

— Arthur Conan Doyle, Sherlock Holmes
