**EA Engineering, Science,  
and Technology, Inc., PBC**

On behalf of the federal government, EA has identified, investigated, assessed, and mitigated impacts to the environment at thousands of sites across the United States and abroad. The majority of this work has been conducted under IDIQ contracts set-aside for Small Businesses under NAICS Code 562910 Remediation Services. As a result, we are highly experienced with characterizing hazardous wastes, petroleum products, and other chemical constituents; addressing concerns associated with radioactive constituents, unexploded ordnance, and munitions constituents; and mitigating impacts to natural resources. Our network of nationwide offices includes three in Texas – Dallas, Houston, and San Antonio. For more information, please visit our website: [www.eaest.com](http://www.eaest.com)

## SAME Fort Worth Featured Sustaining Member Firms – April 2018

Ecology and Environment, Inc. (E&E... [www.ene.com](http://www.ene.com)) has worked with the Ft. Worth District since 1989. E&E currently works closely with the Military Branch to provide military master planning services to the Army, Air Force and Navy, focusing on sustainability initiatives to improve resilience, reduce energy costs and provide better management of military real estate assets, including:

- Military Master Planning Services
- Comprehensive Asset Management Planning Solution (CAMPS)
- Encroachment Action Plans & ICEMAP's

In addition, E&E supports the ERDC workgroup to develop USACE guidance for "Natural and Nature-based Features (NNBF)", the intentional alignment of natural processes with engineered solutions to increase project resilience and provide multiple benefits at reduce costs. For more information, please contact Jason See ([jsee@ene.com](mailto:jsee@ene.com)).
